## 1. Introduction

With a view to enhancing enrolment, retention and attendance and simultaneously improving nutritional levels among children, the National Programme of Nutritional Support to Primary Education (NP-NSPE) was launched as a Centrally Sponsored Scheme on 15th August 1995. The scheme underwent many changes over the years and is now known as “National Programme of Mid Day Meal in Schools”. Over 10 crore eligible school children in almost 11 lakh schools benefit from the Scheme. In order to efficiently manage the enrolment and meals being served in the Schools of various States, the MDM-ARMS software has been developed as a product so that any State Education Department can use it. The data collected will be reflected on the National Portal on daily basis.

### 1.2 Objective

Instant reporting of meals served in various schools of the State/ Country through different communications modes.

### 1.3 Software Features

- Easy **on-boarding** for States:
- Data collection through different modes of SMS, Mobile App, Web

- Keep a check on the quality of data being reported
- Generate Auto-alerts to ensure that the data is reported by all schools
- Web-based software for creation of Master data and its management
- Exception reporting in case of erroneous data reporting
- Inspection reporting for cross checking of reported data
- MIS reports and graphical dashboard
- Generalised SW, so that user State can put all their own data on the website
- State Instance available on the direct URL like <http://mdmhp.nic.in>
- Data transfer to National portal in pre-defined formats

## Home page of MDM

### 2.1. Web Based System

#### 2.1.1. Introduction to Web Based System

MDM is web-based application software that can be accessed through the web browser. The software and database reside on a central server rather than being installed on the desktop system and is accessible over a network.

Web based application is a way to take advantage of today's technology to enhance the government productivity & efficiency. Web based application gives an opportunity to access the office information from anywhere in the world at any time. It also facilitates to save time & money and improve the interactivity with higher authorities, subordinates and citizens.

With a computer connected to the Internet, a web browser and the right user name and password, officials can access the systems from any location. Web-based applications are easy to use and can be implemented without interrupting the existing work process.

#### MDM

After Selecting State Home page of MDM Application->>

URL (<http://mdmhp.nic.in/home/Index/hp> )

Figure: Home Page of MDM application in a Web-Browser (Google Chrome)

**Home page** is a start or main web page of a website that appears first on the screen, when a web based application is accessed through the web browser.

### **Benefits of Web Based application**

Below are some of the core benefits of web based applications:

- ❖ **Virtual Office:** The Officers/Officials can access the application from anywhere at any time using technology such as laptop, computers, cell phones and internet access. Officers / Officials can manage their daily tasks even from outside the office.
- ❖ **Cross platform compatibility:** Web based applications are far more compatible across platforms than standalone applications. Typically the minimum requirement would be a web browser of which there are many (Internet Explorer, Firefox, Netscape etc.). These web browsers are available for a multitude of operating systems and so whether you use Windows, Linux or Mac OS you can still run the web application.
- ❖ **More manageable:** Web based systems need only is installed on the server placing minimal requirements on the end user workstation. This makes maintaining and updating the system

much simpler as usually it can all be done on the server. Any client updates can be deployed via the web server with relative ease.

- ❖ **Highly deployable:** Due to the manageability and cross platform support deploying web applications to the end user is far easier. They are also ideal where bandwidth is limited and the system and data is remote to the user. At their most deployable you simply need to send the user a website address to log in to and provide them with internet access.

This has huge implications allowing you to widen access to your systems, streamline processes and improve relationships by providing more of your customers, suppliers and third parties with access to your systems.

- ❖ **Secure live data:** Web based system processes can often be consolidated reducing the need to move data around. Web based applications also provide an added layer of security by removing the need for the user to have access to the data and back end servers.
- ❖ **Reduced costs:** Web based applications can dramatically lower costs due to reduced support and maintenance, lower requirements on the end user system and simplified architecture.

### 3. *MDM*

1. Type URL of MDM website in the Address Bar of web browser (Google Chrome/IE) as <http://mdmhp.nic.in/> . An address bar (also location bar or URL bar) is a feature in a web browser that accepts a typed URL that the user wishes to go to.

#### *Menus*

- **Home Page can see the different menu options**
  - **Sub-menus under Home menu**

### 3.1. HOME

- As Shown in Fig. MDM 1.1 given below.
- User will click on the “Home” menu option and Notification details can be seen, as shown in Fig 1.1

Fig. MDM 1.1: Home Screen

- User enters value in the “Search” text box and will click enter button to show records.

The screenshot shows the 'Search User' interface. At the top, there are 'Search Options' with radio buttons for 'User Name / Mobile No.' (selected) and 'School Name / School Code'. A search box contains 'Naveen' and a search icon. Below this, a green banner indicates 'Search Successful for "Naveen" 24 Records Found'. A 'Show 10 entries' dropdown is present. The main section is titled 'Employee Details' and features a table for the user 'NAVEEN'. The table has columns for User ID, District, Mobile No., User Level, Block, Email ID, Active, Cluster, and Schools Mapped.

NAVEEN					
User ID	6704	User Level	Principal	Active	Yes
District	KULLU	Block	NIRMAND	Cluster	NIRMAND-II
Mobile No.	9817161200	Email ID	--	Schools Mapped	1 <a href="#">View</a>

Fig. MDM 1.57: Search User Details.

#### 4.1.4. Change Mobile Number (only State admin, District and Principle User will be Use)

- Change Mobile Number Details can be seen, as shown in Fig 1.58
- User will choose “District”, “Education Block” and “Cluster” from drop down.
- User will click on “Change Mobile No” Link to Update Mobile no.

The screenshot shows the 'Manage User's Mobile Numbers' interface. It features three dropdown menus for 'District' (211 - SHIMLA), 'Education Block' (21116 - SUNI), and 'Cluster' (211160001 - BASANTPUR). A 'Search' button is located below the filters. Below the search area, there is a 'Show 25 entries' dropdown and a search box. The main part of the interface is a table with columns for Sr. No., User Name, User Level, Mobile No., and Action.

Sr. No.	User Name	User Level	Mobile No.	Action
1	HEM PRAKASH	MDMIncharge	9418760886	<a href="#">Change Mobile No.</a>
2	KHEM RAJ	Principal	9418861957	<a href="#">Change Mobile No.</a>
3	MEENA VERMA	Principal	9418894756	<a href="#">Change Mobile No.</a>

Fig. MDM 1.58: Change Mobile Number List.

- After Clicking on “Change Mobile No” Link, Update Mobile No Screen will be opened and can be seen, as shown in Fig 1.59.
- User will be entering “New Mobile no” in the given Text Box.
- User will click on “Save” Button.
- User will get a response message.

#### 4.6.4. Frequently Asked Question (All MDM Users Available)

- User will click on the 'Frequently Asked Question' Sub menu option and FAQ details can be seen, as show in Fig 1.129

**Frequently Asked Question**

**1 : How can I check if my mobile number is registered for sending data?**  
 You need to contact the concerned authority of your school/block/district whether your mobile number has been mapped with the MDM for reporting.

**2 : As MDM School Coordinator, how frequently should I send the meals data?**  
 You need to send the MDM daily data with in the pre-defined time range (SMS Start and End time) of your State. This time limit will be set by your State Administrator.

**3 : Is there any other data besides daily meals served/taken, to be sent?**  
 No other data needs to be sent despite daily/monthly.

**4 : How can I send daily meal data?**  
 You can send data by (1) SMS in pre-defined format to toll free non-metered number 15544, (2) Mobile App-with or without Internet connectivity, (3) Data will be collected through a voice call by OBD-outbound dial back in case SMS data is not received till the designated time, (4) Through the website if you have access to Internet (5) Through the cluster head or Block Education Officer by calling their office and giving the daily information to them who can use the Mobile App or Web App to enter your data.

**5 : I am a School MDM coordinator but I don't have a mobile phone. How can I send daily meal data?**  
 You can send the data by using the web interface of MDM by logging with your username and password. You can also the call center to report the data.

**6 : I am a School MDM coordinator and I have a mobile phone. But the phone doesn't work in or around the school campus. What should I do?**  
 You can send the data by using the MDM mobile application SMS feature. The SMS sent will be free.

Fig. MDM 1.129: Response Message show.

4.6.5. Download Formats (only State admin will be Use)

- User will click on the 'Download Formats' Sub menu option and Formats details can be seen, as show in Fig 1.130

**Download Formats**

1. Format-For-DistrictWise-MDM-Data-Porting
2. MDM-Instructions-Masters
