PM-POSHAN Mobile App

**D**escription: PM-POSHAN mobile app is meant for effective monitoring of daily and monthly mid-day meal data to be sent by the schools. The app provides additional data communicating mechanism for the MDM in-charge/teacher who has to send the daily/monthly data using SMS. The app, once installed on android device, does not need Internet to send meal served figures as user has option to send the figure through SMS from the app. This simplifies the job of MDM in-charge, who even does not have to remember the SMS formats. The higher authorities at Block, District and State level have a very simple and effective mechanism in shape of this app on their mobile devices for effective and efficient monitoring of daily as well as monthly data transmission by all the MDM in-charge falling under their jurisdiction. The authorities can send SMS alerts to all defaulters using single button available in the app.
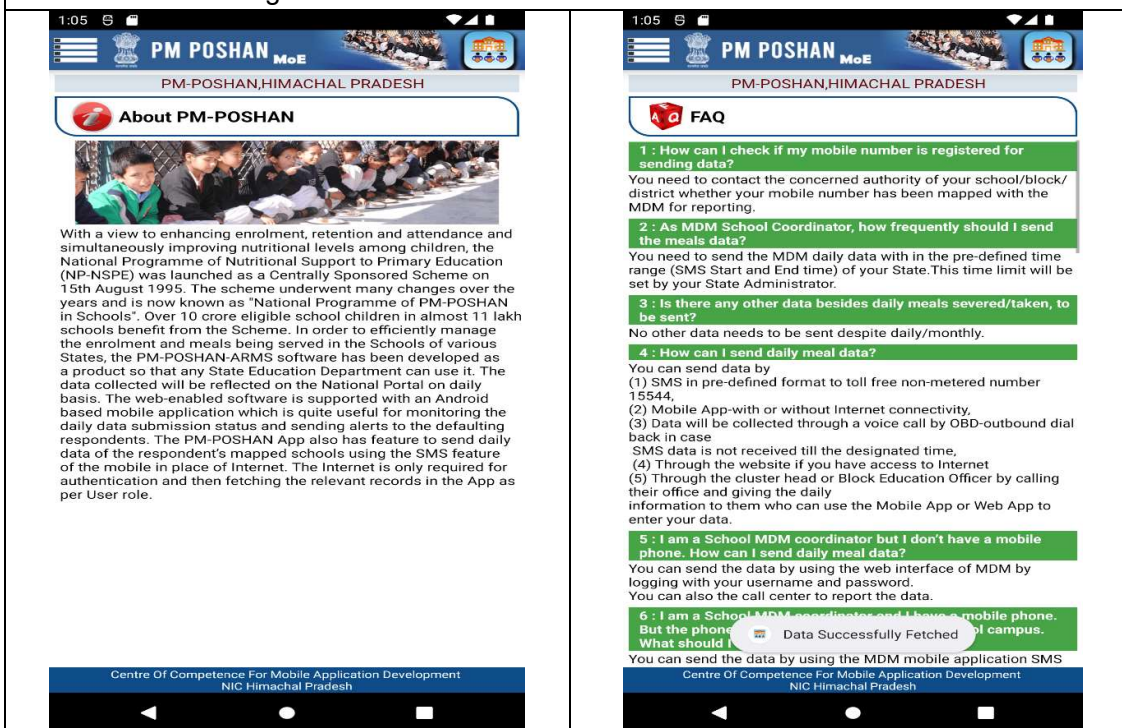

Administrative Information
